

Agrimat

Root Zone Heating Systems

caring for the world we live in...

- Homogeneous mat installed at the base of the growing units.
- Yields a uniform heat that speeds up the growing process in the greenhouse.

A warm growing medium is essential for the enhanced growth and maturation of plants and for roots generation from cuttings

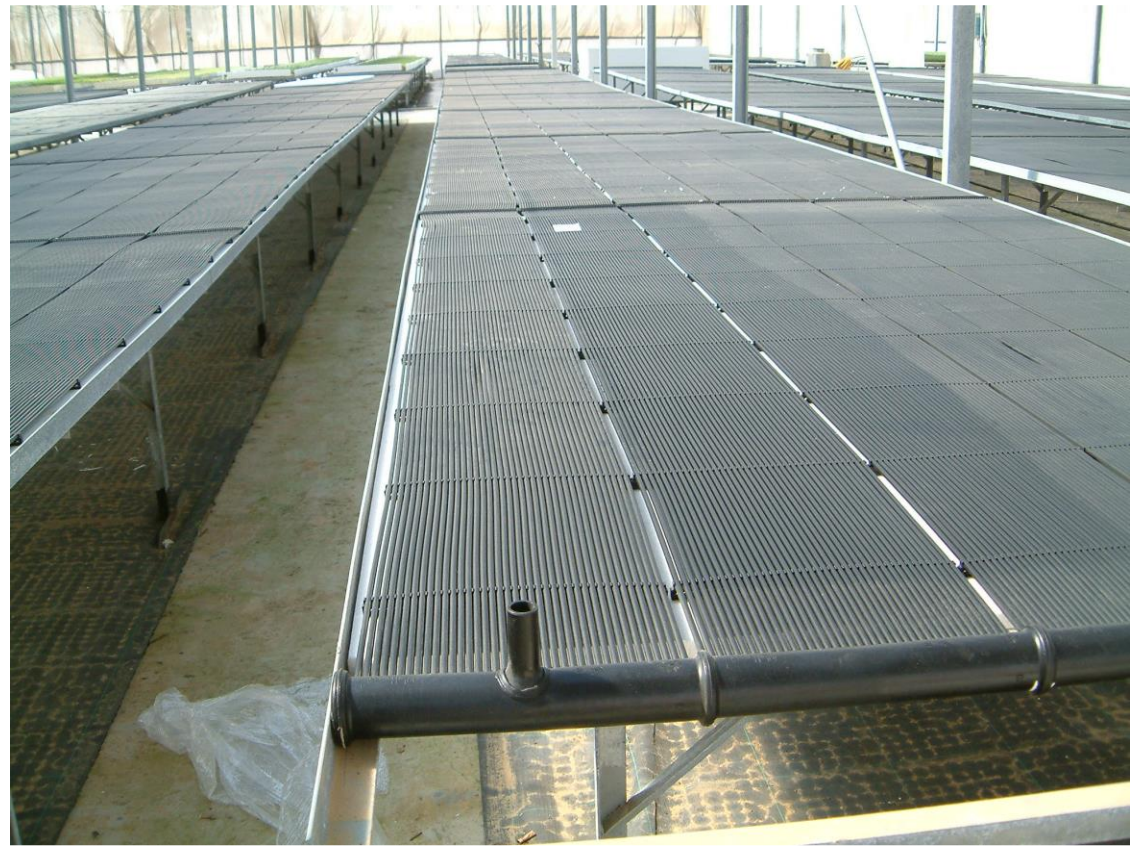

- Constant & Controlled temperature in the root zone
- Safe and economical positioning of all types of growing trays
- Energy-saving system for heating the greenhouse space during the cold season

- Flexibility and simple assembly and dismantling
- High resistance to corrosion, scale, salts and fertilizers
- Easy cleaning and sanitizing

- Can handle a working pressure of up to 4 bar (60 PSI) at 60°C
- The MATS are tailor-made in order to meet the agriculturist requirements (inlet/outlet type & direction)

Dimensions

Length: Flexible

Width: at intervals
of 30 Cm (1 ft)
~ 30/60/90 Cm
